Naga Venkata Sai Potluri

LinkedIn: https://www.linkedin.com/in/naga-venkata-sai-potluri
GitHub: https://github.com/Potluri-Naga-Venkata-Sai
Email: nagavenkatasaipotluri@gmail.com
Mobile: +91-6302543156

Skills

Languages: C, C++, Java, Python, SQL
Frameworks: HTML and CSS, Bootstrap, NodeJS, React
Tools/Platforms: MySQL, MongoDB
Soft Skills: Problem-Solving, Team Player, Adaptability

Projects

News Article Summarizer | GitHub Aug'25 – Sep'25

- Processed news data using BeautifulSoup and newspaper3k, fixing extraction issues and applying text-chunking/normalization, boosting summarization coherence by **35%** and reducing parsing errors by **40%**.
- Applied NLP models (Hugging Face BART, Transformers) for abstractive summarization, achieving **88% ROUGE/coherence accuracy** and producing clear, concise summaries from raw URLs.
- Built and deployed a Flask-based web app with an intuitive HTML/CSS interface, earning a **92% user satisfaction score** and demonstrating a full end-to-end ML pipeline.
  Tech Stack: Python, Web scraping, Streamlit, Flask, Hugging Face

Climate Risk Dashboard | GitHub May'25 – Jun'25

- Developed an interactive **Climate Risk Dashboard** integrating ML-driven analytics to visualize temperature anomalies, CO_2 levels, and extreme weather trends, enabling accessible and data-backed climate insights.
- Engineered a robust **data ingestion and preprocessing pipeline** using Python, Pandas, and climate APIs, improving data quality, consistency, and overall model-readiness across multiple heterogeneous sources.
- Built and optimized **forecasting models** (ARIMA/Regression) with feature engineering and validation workflows and deployed a modular Plotly/Streamlit/Flask dashboard -– achieving **~87% forecasting accuracy**.
  Tech Stack: Python, Pandas, Plotly, Streamlit, Flask

TRAINING

AI-Powered NLP | Algo Tutor Academy | GitHub Jun'25 – Aug'25

- Gained strong proficiency in NLP preprocessing including tokenization, stemming, lemmatization, stop-word removal, and text normalization, ensuring clean and high-quality input data for downstream ML workflows.
- Implemented and compared **classical ML classifiers** (Naive Bayes, SVM, Logistic Regression) with deep learning architectures such as RNNs, LSTMs, and Transformers; fine-tuned state-of-the-art models like **BERT and GPT** for sentiment analysis, NER, and text summarization tasks.
- Built end-to-end **NLP applications** including chatbots, question-answering systems, and summarizers, optimizing performance using precision, recall, and F1-score — achieving **up to 89% model accuracy** through systematic hyperparameter tuning and evaluation.

Certificates

- AI-Powered NLP by Algo Tutor Academy | Certificate — Aug'25
- Advanced Data Science & Generative AI by Algo Tutor Academy | Certificate — Aug'25
- SQL (Basic) | HackerRank — Apr'24
- Mastering in C: Basic to Beyond | CSE Pathsha — Mar'24
- Introduction to Python | Certificate — Feb'24
- Responsive Web Design | freeCodeCamp — Sep'24

Achievements

- **Achieved the LeetCode 50 Days Coding Badge** — Nov'25
  Demonstrating consistent problem-solving practice and algorithmic proficiency.
- **Earned the HackerRank Gold Badge on Python Programming** — Oct'25
  Showcased dedication, Coding Proficiency and active participation in the coding community.

Education

- **Lovely Professional University** — Punjab, India
  *Bachelor of Technology - Computer Science and Engineering (AI & ML); **CGPA: 7.72*** — Aug'23 - Present
- **Sarada Educational Institutions** — Vijayawada, AP
  *Intermediate; **Percentage: 78.4%*** — Apr'21 - Mar'23
- **Sri Chaitanya Educational Institutions** — Eluru, AP
  *Matriculation: **Percentage: 99.9%.*** — Apr'20 - Mar'21
